

How it Works

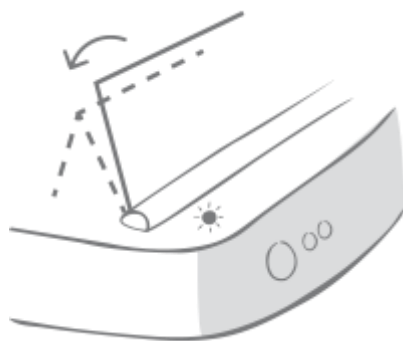

Programme your pet's microchip at the touch of a button.
Your pet's microchip is then permanently stored in memory

The lid opens when a registered pet approaches.
Your pet can access their food at any time without the fear of it being stolen

The lid remains closed for unauthorised pets.
All your pets can now live healthier lifestyles

Introduce movement to the lid gradually.
The training mode helps pets get used to the feeder in their own time
